The **P&L SPECIALTIES 1/2 TON BIN RINSER** reduces the time spent handling bins and provides more convenient cleaning vs. traditional hose rinsing. Our innovative design allows the forklift driver to remain on the forklift during the rinsing process. This saves time and improves safety. Rinse water is screened through a removable basket which collects solids, keeping them out of your waste water system.

It requires only hot or cold water from a standard winery hose at typical winery pressure. Our proprietary design requires no electrical

connection. The machine features all stainless steel construction for longevity and is manufactured using the finest components. Both front dumping and side rotating models available. Sometimes simple is better.

AFFORDABLE • CONVENIENT

SAVES LABOR • DEPENDABLE

THE 1/2 TON BIN RINSER IS A P&L SPECIALTIES PROPRIETARY DESIGN.
