CME has been producing high quality winery equipment since 1946. So, it is no surprise that their line of **DPN DESTEMMERS**

also stand up to your unwavering standards. The **DPN DESTEMMER'S** heavy duty construction is perfect for any winery wanting a field tested machine for high quality output and flexibility during crush. The DPN are reliable, beautifully executed and are equipped with the latest in

safety devices and speed control by inverter. The DPN adjusts easily for distance between blade and cage. Adjustable crusher rollers, roll clear of the path for whole berry production. A draining hopper with screw is an available option for machine harvested fruit. A very popular feature is the ability to remove the cage and destemming mechanism either horizontally or vertically (a must in tight spots). With years of feedback from winemakers and production crews, CME has designed the DPN series of **DESTEMMERS** to be easy to clean.

- DPN 10 up to 8 Tons per Hour
