

P&L SPECIALTIES

MANUFACTURING THE FINEST STAINLESS STEEL EQUIPMENT

1650 Almar Parkway • Santa Rosa, California 95403

P 707 573 3141 • F 707 573 3140

www.pnlspecialties.com • CA Contractor's License #803431

The **P&L SPECIALTIES LT™ (LE TRIEUR™)** is mounted underneath or downstream from your de-stemmer, this machine's innovative design allows unripe "shot" berries, stem jacks, raisins and Materials-Other-than-Grape (MOG) to pass through the wedge-wire screen. **LE TRIEUR'S** gentle shaking motion then allows the whole, ripe berries to easily pass onward. This technology has dramatically reduced the labor required for post-de-stemmer sorting.

As featured in recent *Practical Winery & Vineyard*, *Vineyard & Winery Management*, *Wines & Vines*, *Wine Business Monthly* Magazines New Products sections; "The **LE TRIEUR** means a giant leap forward in the

quality of must going to your fermenters!"

Manufactured entirely of stainless steel, and equipped with a programmable VFD for complete range of speed control. **LT™ (LE TRIEUR™)** is very easy to operate, clean and allows juice to be captured. **LT™ (LE TRIEUR™)** can be designed to fit into your existing line or, of course, will integrate easily into existing or new P&L Specialties processing lines.
