We have developed a pneumatically operated **SLIDING DISCHARGE DOOR** for screw conveyors that really works. The doors are watertight and perform flawlessly. This industry innovation is the result of hundreds of hours of R&D prior to active service.

P&L SPECIALTIES SLIDING DOORS offer a real alternative to using knife gate valves. These doors reduce capital costs, maintenance expenses, reliability problems, and dead zones associated with knife gate valves.

The **SLIDING DISCHARGE DOOR** fits tightly to the conveyor profile, thereby eliminating product build-up. The result is gentler conveyance with the door closed, and zero material build-up.

Our engineering department can retrofit the **SLIDING DOOR** to existing screw conveyors as well as incorporate them into new systems. Our **SLIDING DOOR** design is watertight, low maintenance, and cost effective. We have many units currently in service. Call us for a demo.

REDUCES CAPITAL COSTS • WATERTIGHT DISCHARGE GATES

GENTLER ON THE PRODUCT • PROVEN DESIGN
