P&L SPECIALTIES has developed a **DISCHARGE GATE SYSTEM** for our belt conveyors.

The **P&L SPECIALTIES** gate system dramatically reduces capital costs because our design allows a single fixed belt conveyor to discharge product at many different points, thereby eliminating the need for additional transfer conveyors.

This innovative design is an efficient solution that uses a single belt rather than multiple belts. The result is the elimination of tumbling and falling fruit, and a cleaner, simpler system. The sliding doors are pneumatically operated, which enables them to function smoothly and provide precise discharge control.

Our engineering team can design this special conveyor into existing delivery systems or as a component of a new system. These **SLIDING GATE CONVEYORS** perform superbly, offer gentler product handling, and are more cost efficient than traditional designs. Call us for a demo.

REDUCES CAPITAL EXPENDITURE AND COSTS

GENTLER ON THE PRODUCT • PROVEN DESIGN
